FILIBE GONÇALVES

Software Engineer Experienced In C#, ASP.NET Core, Python And Java, As Well As AI Engineer Experienced In OpenCV, Keras And Tensorflow. Skilled At Building Scalable Web Applications And Leading Projects From Design To Deployment. Winner Of Aveiro Tech City Hackathon (2022).

Work Experience

LightMobie - Universidade de Aveiro - Aveiro, Portugal

- Researcher and Developer** - [Nov 2022 - Jul 2025] *3 years*
 - + Built an MVC web app in **ASP.NET CORE** to manage a large amount of vehicles, stations and users for a bike-sharing platform
 - + Developed the web frontend using **JQuery** and **CSS**, and automated services in **C#** and **Python**
 - + Introduced **Apache Kafka** and **MQTT 4** infrastructures to manage communications and **SQL** to manage databases
 - + Helped managing the team using **Jira** and **Trello**, maintaining the **Agile** workflow with regular Scrum meetings
 - + Worked closely with the client to discuss important requirements, execute their ideas and suggest different solutions
 - + Integrated my master's thesis' machine learning model to improve efficiency during rebalancing

NeRD - Universidade de Aveiro - Aveiro, Portugal

- Developer** - [Dec 2019 - Dec 2021] *2 years*
 - + Worked with tools like **Node.js**, **Flask** and **Marlin**, as well as 3D Printers in various assigned projects
 - + Increased my understanding of hardware and working out of my comfort zone

Education and Training

Master's Degree in Robotics and Intelligent Systems

Universidade de Aveiro - Aveiro, Portugal

Vice Representative (2022 - 2023)

Representative (2024 - 2025)

- Average: 16/20** - [Sep 2022 - Jul 2025] *3 years*
Thesis: Predictive Models for the Redistribution of the Fleet in a Vehicle Sharing System - 18/20

Bachelor's Degree in Computer Science

Universidade de Aveiro - Aveiro, Portugal

- Average: 16/20** - [Sep 2019 - Jul 2022] *3 years*

Secondary School

Science and Technology - Escola Secundária José Estevão - Aveiro, Portugal

- Excellency Board (12th Year)** - [Sep 2016 - Jul 2029] *3 years*

Projects

Hackathon - Aveiro Tech City (2022's Winners) - Aveiro, Portugal

- Developer (SmartGains)** - [Oct 2022 - Oct 2025] *1 week*
 - + Designed an app using **Flutter** to analyse the physical performance of a user and give feedback during his workout
 - + Created a **Machine Learning** model to predict the best weight the user should use in a timespan of at most one month, based on the weight used in his latest exercise and overall physical performance, using Python with **OpenCV**, **tensorflow** and **keras**
 - + **GitHub:** <https://github.com/BrunoRochaDev/SmartGains>

FotoFaces - Aveiro, Portugal

- Team Leader and Developer** - [Jan 2022 - Jul 2025] *6 months*
 - + Improved the existing system of photo validation of **Universidade de Aveiro** by incorporating a microservices oriented architecture and by designing and building a user application in **React Native**
 - + Developed many **Machine Learning** algorithms like detecting the face and its reference, analysing user gaze and face orientation to improve validation accuracy using **Python** with **OpenCV** and **tensorflow**
 - + **GitHub:** <https://github.com/FotoFaces>
